Forecast for Tuesday 07 May 2024

Weather: Cloudy overnight, perhaps some patchy rain or drizzle at first but becoming dry. The day will be mainly dry, mainly cloudy in the morning and early afternoon but gradually a few brighter spells and even some sunshine breaking through in places later, though this mainly towards the coastal regions of the park. A small chance of a light afternoon shower. Cloud breaking up more widely during the evening.

Chance of cloud-free hill tops above 800m: 40% in early hours, improving 80% by morning then more than 90% in afternoon.

Low cloud and visibility: Cloud at 750-900m overnight and at first in morning with lower patches early in night, bases then lifting to towards summits during morning and above in the afternoon the cloud then becoming more broken later. Visibility away from cloud, good by day.

Freezing Level*	1900m	1900m	2000m	2000m	2000m	2000m	2100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Medium sunlight hazard is due to UV levels through thin cloud meaning that sun protection is recommended.

Forecast for Wednesday 08 May 2024

Weather: A dry day with variable cloud and some bright or sunny spells.

Maximum wind: Southerly 10mph becoming southwesterly 15 gusts 25mph in the afternoon.
